WORK EXPERIENCE

UX Designer Intern
Rotterdam, NL
@Sentech AI (Startup) *07/2025 - 12/2025*

- **Market analysis**: Conducted competitive analysis of 15+ stress-related skincare brands in European markets, analyzing website traffic and search trends to support the brand positioning and GTM strategy.
- **0-1 Website building**: Shipped 0→1 e-commerce website independently from concept to live website using Shopify; Prototype the initial frontend using Claude and Lovable for initial versions.
- **Landing page SEO-optimization**: Built SEO-optimized landing pages with brand storytelling to funnel customers for healthcare consumer products.
- **Business Strategy**: Collaborated with cross-functional teams to define functional requirements for an AI-powered scanning ring, developed business model for personalised mental healthcare.

Design Engineer
Rotterdam, NL
@Emergence Delft *07/2025 - 12/2025*

- **All-round Design**: Designed & built an art installation about patients with the lock-in syndrome from 0-1; Analyzed EEG emotion data and transformed into dynamic water patterns. Independently implemented the hardware system including electrical engineering, coding, soldering and waterproofing management.
- **Exhibition**: Showcased the work at the STRP Art Festival in Eindhoven, attracting over 5000 attendees for live experiences.

UX Designer Intern
Hangzhou, China
@NetEase Games *03/2023 - 07/2023*

- **Internal Tool Optimization**: Redesigned an in-house level editor by restructuring information architecture and scaling the design system, resulting in over 20% increase in team workflow efficiency.
- **AI-Assisted Plugin Design**: Developed a UX AI assistant (Cube GPT) via a Figma plugin; optimized prompt templates to increase game text usability accuracy from 65% to 85%.
- **Agile Collaboration**: Collaborated with developers and game designers to deliver wireframes and high-fidelity interfaces for a match-3 game, designing 8 HP bar states with interactive logics.

User Growth Operation Intern
Beijing, China
@Starmaker *01/2022 - 05/2022*

- **Data-Driven Growth**: Designed multilingual UX surveys to evaluate push-notification experience, gathering 1,000+ responses and optimized push strategies, which improved CTR by 12%.
- **App Design**: Participated in the full product lifecycle for a global K-song app, wrote 10+ PRD documents and creating user flows/wireframes for core recording features.
- **User Data Analysis**: Analysed in-app user behavioural data using SQL, identifying high-value users and developed customised strategies to stimulate their long-time app engagement and willingness to pay.

EDUCATION

Delft University of Technology
