RELEVANT EXPERIENCE

Product Designer Intern — *Rotterdam, NL*
@Sentech AI (Startup) — *07/2025 - 12/2025*

- **Research & brand positioning**: Conducted user research for people with neuro related skin disease, analysed European markets' stress-related skincare brands to support the brand positioning and GTM strategy.
- **E-commerce web design**: Led end-to-end brand website design with high-fidelity interfaces; conducted sprint planning, early web testing with real customers.
- **Early product development**: Collaborated with cross-functional teams to define functions for an AI-powered scanning ring, developed business model for personalised mental healthcare.

UX Researcher & Designer — *Delft, NL*
@Stichting Hospital Hero (University Collaboration) — *11/2024 - 02/2025*

- **Interviews & Problem scoping**: Conducted interviews with stakeholders to identify core healthcare challenges for immigrant families; analyzed persona and user journey map that drive product innovation directions.
- **System Inclusive Design**: Tested Hospital App to identify accessible barriers for immigrants; Designed parent-profile education, medical trajectory interfaces, and multi-language functions to improve the app's accessibility.
- **Social Impact**: Developed offline service strategies for non-Western migrant groups in Dutch children's hospital in the company's inclusive roadmap.

UX Designer Intern — *Hangzhou, China*
@NetEase Games — *03/2023 - 07/2023*

- **Mobile game design**: Collaborated with developers and game designers to deliver wireframes and interfaces for a match-3 game, including main entrance concepts, HP bar interactive logics for core battle interfaces; Wrote UX handover documentation for game development.
- **Level editor development**: Redesigned the game level editor by restructuring user flows, scaling the design system and building the WCAG accessibility guidelines, resulting in over 20% increase in team workflow efficiency.

UX Designer Intern - User Growth — *Beijing, China*
@Starmaker — *01/2022 - 05/2022*

- **Data-driven growth**: Designed multi-lingual UX surveys across South Arabic, India and Spanish areas to evaluate push-notification experience, gathering 1,000+ responses and optimized push distribution strategies & content writings, which improved CTR by 12%.
- **User data dashboard**: Analysed in-app user behavioural data using SQL, identifying high-value users and developed customised strategies to stimulate their long-time app engagement and willingness to pay.

EDUCATION

Delft University of Technology
2023.09 – 2025.09

MSc. Design for Interaction

Beijing University of Posts and Telecommunications
2019.09 – 2023.09

BEng. Industrial Design (Artificial Intelligent Interaction Design)

SKILL

Design & Prototyping

Figma, Adobe CS, UI/UX Design, Wireframe, Design system, WCAG, Video editing, Content marketing

Research & Strategy

Usability testing, Interviews, Quantitative/Qualitative research, Workshop facilitation

Coding Skills

Fluent in JavaScript, HTML/CSS, Python; Skilled in Vibe coding (Cursor, Claude Code, Figma Make, Lovable); Work experience with hardwares

LANGUAGE

English (C1, Professional)

Mandarin (Native)

Dutch (A2)

Japanese (N3)

OTHER EXPERIENCE

Design Technologist
@Emergence Delft

Delft, NL
11/2023 - 02/2024

- **0-1 art installation design**: Designed and built an art installation from concept to final implementation about locked-in syndrome.
- **User research & prototyping**: Interview patients and analysed EEG emotional data to generate water pattern concepts; built prototypes for visual aesthetics.
- **Open exhibition**: Showcased the work at the STRP Art Festival in Eindhoven, attracting over 5000 attendees for live experiences.

Workshop Facilitator
@hii

Delft, NL
05/2025 - 10/2025

- **Mental health workshop facilitation**: Facilitated design-thinking workshops to foster open mental health conversations with the topic on stress management, personal strengths, and communication skills.
- **Impact**: Finished a total of 12 workshops with over 60+ university students.
